Treasure of info, ideas!By University DocSure, this is a children's book, but it is a great one chock full of ideas that can be transferred to a miniature dollhouse and diorama without much effort, if any at all. It is an old book, but the same goes for this too. I mistakenly requested it at my library not knowing it was a children's book until I went to pick it up. I decided to give it a peek and I am so glad I did. In fact, I found that I read and read it so many times that I finally purchased my own copy from and I'm so glad that I did.It isn't a thick book at just 56 pages, and the photos are in black and white, but there is a treasure within those pages. Build a sofa out of a sponge for the living room, an easy chair, an end table or a fireplace from a simple box, you can even add stones to it for a stone fireplace. Make a clock using a button, paper and glue, a mirror from aluminum foil, and sculptures from chess pieces.Before you even start making any mini's it tells you what to save. Those simple things that even miniature enthusiasts might ignore, or not. Basic tools and materials are delved into. Then, the author takes you room by room to makes those things to fill the home. Oh sure, this is written for children with that type of dollhouse in mind, but why not adapt it for the adult miniature dollhouse? Isn't that what miniaturist's do anyway? Adapt normal everyday household items to fill a dollhouse?Personally, I love this book and will use it as a guide to make some things in it for my dollhouse mansion. It's so easy to follow. I have no problem

recommending it to anyone that makes mini's.0 of 0 people found the following review helpful. Childhood NostalgiaBy Nikki N.I used to borrow this book from the library at my elementary school for 3 grades. I couldn't remember the name or author of this book once I left that school. One day I found it by a Google search by accident and couldn't wait to buy it. It still makes me remember my excitement and inspiration to get creative and make tiny things. I still create things today, but in a much more polished manner than matchboxes and paper fasteners. :p3 of 3 people found the following review helpful. fabulous memoriesBy MeI used to check this book out from the library constantly as a kid. I wanted a dollhouse more than anything so I was always making furniture. I just bought this last year and was almost brought to tears when I opened it-it's just so much fun and it's really inexpensive stuff, like using toothpaste caps for lampshades, or marker caps for flower vases. Definitely great for rainy days.

A sponge becomes a sofa and a broken watch a clock. A pretty stamp becomes a picture for the wall and a playing card a rug for the floor. All this is a kind of magic, magic that you do yourself - dollhouse magic. Fun and creative ideas for finding or making wonderful, one-of-a-kind pieces of dollhouse furniture.
