Northrip We have recently become collectors of Sarah Coventry fashion jewelry and purchase these items through Ebay. This book gives us a lot of information necessary to make informed purchases to add to our collection. The book appears to be most accurate and more detailed than some other Sarah Coventry publications. Actual dealer catalogs are of course best to have, but in lieu of these, we feel you will find this an excellent guide to Sarah Coventry costume jewelry. We find that the book's market prices are fairly accurate and the photos also guide you in selecting the sets that you want to obtain. Having said this, remember Ebay prices vary and we find that buying separate items is often less expensive than buying a full set. 14 of 14 people found the following review helpful. Emmons Sarah Coventry Jewelry Fashion Show By L. Burns When I first looked through this book, I was disappointed that it was organized by categories (earrings, bracelets, etc.) rather than showing the matching pieces of a parure together. However, when I needed to look up the name of a particular bracelet, I realized how time-saving this feature is. (The matching pieces are cross-referenced, which makes up for them not being shown together.) This book is very informative and includes the name and description of each piece, along with how it is signed and when it was made. A lot of books on vintage jewelry don't have this information, which is very frustrating. The book also includes some interesting information on company history, advertising, hostess gifts awards, catalogs, and packaging. This book has been very helpful to me. The only drawback is that the photographs are on the small side; you may want to supplement it with a book that has larger photos and/or photos that show all the pieces of a parure together if this is important to you. 0 of 0 people found the

By Customer I love this book. I am a big fan of Sarah Coventry jewelry. It takes me back to my childhood, and the collection that my neighbor had. I use this book for a reference to the large amount of pieces that I already own, and to see pieces that I am looking forward to purchasing! Thanks for a wonderful book!
