**Grady Holcombe : Never Mace A Skunk II: The Legends Continue** before purchasing it in order to gage whether or not it would be worth my time, and all praised Never Mace A Skunk II: The Legends Continue:

Give a million monkeys a million typewriters, and one will write the works of Shakespeare. Give two relic hunters computers, and they'll write Never Mace A Skunk II: The Legends Continue. Laugh as this metal detector-wielding duo share the joys of preserving history while battling vengeful vegetation, persistent pets, mechanical malfunctions, grievous ghosts, and lonesome livestock. Through their true adventures, you'll learn why so many head for the woods with a metal detector: It's fun to recover history, and live to tell about it! This is the sequel to Never Mace A Skunk, one of the most popular books ever written on the hobby of searching for Civil War artifacts. This time, author Butch

Holcombe teams up with Charles Harris, and together these two legends take us through such chapters as "The Paranormal: Twice As Scary As A Single Normal;" "Farfendigging: Because Getting There Is Important Too;" "Safety First...Right After The Relics;" and "Love Is Blind...And Boy Are We Glad!". Hilariously illustrated by Glenn Watkins, you'll laugh until you cry, and then laugh some more as you discover this fascinating hobby. Whether a relic hunter or not, if you enjoy humor, you'll love Never Mace A Skunk II: The Legends Continue!

About the Author Butch Holcombe has over thirty years experience relic hunting, and is the publisher of American Digger Magazine, a bi-monthly publication of early American artifacts. He was the author of the original Never Mace A Skunk, as well as numerous published articles. Known for his humorous style, it's been said that he is "Lewis Grizzard with a metal detector." Charles Harris has been telling stories and writing articles on Civil War relic hunting since 1971 with over 90 to his credit. Some have been serious with a very valid historical context, but some have been very humorous as exhibited in this new publication. He is the author of Civil War Relics of the Western Campaigns, 1861-1865, a standard reference work.
