Edward Malakoff : Pairpoint Lamps before purchasing it in order to gage whether or not it would be worth my time, and all praised Pairpoint Lamps:

However, I felt that there could have been more information given. For example no manufacturing dates were given for any of the lamps. The company was in operation for many years and it would be nice to know which lamps were earlier examples, later examples, etc. Also, no sizes for lamp bases are mentioned. I was interested in a particular lamp shade and have no idea how tall the appropriate lamp base would have been. There is a rarity scale of 1 - 3, but it is difficult to understand. Which is best? exceptionally rare, unusually rare, or choice? Maybe an explanation of "choice" would be helpful. Is "choice" the most desirable or least? The book itself

contains over 200 wonderful photos and several pages of original ads. It would also have been helpful to be given some idea of values of the lamps. I know that they are quite collectible, but no information was given on how or where to have one appraised.

The exceptional beauty of Pairpoint glass lamps has been cherished since their origin in New Bedford, Massachusetts, between 1907 and 1929. Now, for the first time, the complete range and diversity of these magnificent, softly glowing works of art are shown together in a useful source and reference. More than 200 full-color photographs, excerpts from company catalogs, and advertisements detail the designs, shade styles and sizes, and serial numbers of the lamps. A rarity guide is included. The book features chapters on the beautiful variations of shade styles, including puffy, ribbed, and scenic; and chandelier, non-electrified, and floor lamps.
