A unique experience By David E. Bradley As one who grew up in the UK during World War II, "Postcards from World War II" provides an unexpected insight into what conditions were like in America. It never occurred to me that anyone outside Europe had price controls, food rationing and other restrictions. The text is not just a chronicle of events, it complements the numerous evocative postcards to give the reader a unique experience. Many are difficult-to-read scribbles, but are transcribed at the back so their all-important words can be read with ease. The publishers have provided high quality reproductions with unexpected clarity. This is a fine book.

These unique full-color books capture the events and emotions of times gone by through beautiful postcard images, personal messages, and captivating text. Each book is designed to bring alive not only the sights of the last century, but also the sentiments—whether those of a young actress telling her family that she's landed a job with Rudy Vallee's revue, or of an army corporal letting his friend know that he'll be discharged by Christmas 1941. Perfect as mementos, pictorial histories, and gifts, the Postcards From . . . Series transports you back in time, allowing you to explore the events, places, and people that have enriched our country and our culture.
