Antonio Neri, Christopher Merrett : The Art of Glass before purchasing it in order to gage whether or not it would be worth my time, and all praised The Art of Glass:

THIS is the first of a series of volumes edited by Professor M. Cable illustrating progress in understanding glass making from the 17th century to the early part of the 19th. Known as THE WORLD'S MOST FAMOUS BOOK ON

GLASSMAKING, it was first published, in Italian, in 1612, as *L'Arte Vetraria* by Antonio Neri who claimed to have experience of glassmaking in several countries and described the best practice of that time, particularly in making coloured glasses. A second edition printed in 1661 made the work more widely known. An English translation by Christopher Merrett MD, one of the early Fellows of the Royal Society, was published in 1662. Merrett added very extensive notes of his own which almost doubled the length of the book. That text became the master for subsequent editions. It was eventually translated into Latin, French, German, and Spanish, and reprinted at least twenty times over the course of almost two centuries. This edition reproduces Merrett's original layout, including the printers ornaments, but is set more legibly and corrects some errors. It is introduced by an essay written in 1962 by Professor W. E. S. Turner FRS which explains the background and importance of this work.
