James Laymond : The Book Journal: Your Reading Adventure before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Book Journal: Your Reading Adventure:

3 of 3 people found the following review helpful. Most complete and useful of its kind! By SanThe Book Journal has what I was hoping for that's not found in other book journals. It's also a normal sized book compared to most of the others that are too small and have small spaces to write in. The Book Journal has normal sized pages and areas where I can write at a normal size instead of cramping my hand to write in the miniature areas provided by the other books of

its kind. On top of that, there's more room to write more about the book I'm reviewing/journaling. The Book Journal also provides a strategic table of contents that seems more straight forward than the others. I like the book group section as well as the section for books that I've loaned out and the sections for books I want to have and my favorite books. Finally, I like how this book feels. It feels like a novel from the size of the book to the feel of its cover to the page color and fonts. Definitely happy with my purchase! 2 of 2 people found the following review helpful. Recording made easy By skyla Just what I wanted! The book is detailed and I can tell it will help me not only keep up with the odds and ends of the books I read, but will help me pull more out of books than only reading. I know I'm not supposed to judge a book by its cover, but this book is beautiful and, like another reviewer said, looks and feels like a novel. It's bigger than other book journals that are too small, but not too big in that the book is simply a normal sized book. I even like the smell of this book! But in all seriousness, it's very well put together and has already been highly useful to me. I'm looking forward to using it in book group! 0 of 0 people found the following review helpful. Its Okay. By FillCollins I purchased two different book journals as gift options for my niece. This one wasn't as good as the other but I kept it anyways to use as a White Elephant gift. It is geared towards adults, as there is not much to do in the book other than journal about the plots of the book. Still useful, but not as fun for a young reader.

Book Journal: With The Book Journal in your hands, gone are the days of forgetting the key details of your favorite books. Reading is an adventure that must be chronicled and The Book Journal brings out the details of your favorite reads like none other. This book journal is ideal for avid readers, reading or book groups, and students. It helps bring out details in both fiction and nonfiction books.
