**A.E. Hartink : The Complete Encyclopedia of Pistols and Revolvers** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Complete Encyclopedia of Pistols and Revolvers:

0 of 0 people found the following review helpful. Absolutely the best book (not one of) about hand guns and revolversBy James LeeAbsolutely the best book (not one of) about hand guns and revolvers. It includes historic and current production guns from all major gun manufacturers of world, with a rather comprehensive survey of the history of each. All guns and the different version/models are illustrated with high quality photographs. Besides major gun manufacturers, it also listed some of the minor but famous custom gun makers in the US such as SV, STI, and Les Baer. In addition, it also have a rather comprehensive. richly illustrated glossary list. For example, explaining the different barrel locking mechanisms, safety features, etc, is very useful and fun to read and understand.The major

drawback is that the book was copyrighted in 2002 but reprinted in 2012, thus new gun models developed after 2002 are missing. A minor draw back is that the writing seems to need some polishing for conciseness. 0 of 0 people found the following review helpful. Four Stars By Michael R. Albert Good book. 0 of 0 people found the following review helpful. Exhaustive catalog By Sedentary Mike Exhaustive catalog of handguns with a lot of text typos and some curious omissions -- Uberti reproductions and Wilson Combat pistols for examples.

This extensive and useful encyclopedia is specially written for sport shooters, weapons collectors, and government officials. Inside readers will find: An extensive glossary of technical terms and types of ammunition, complete with full color illustrations Information on arms manufacturers and makes of pistols from around the world Detailed descriptions of each weapon, often accompanied by its history and development Information on handguns of the nineteenth, twentieth, and twenty first centuries An extensive index to help readers find specific weapons or subjects Hundreds of color photographs of pistols and revolvers

About the Author A. E. Hartink grew up with firearms; both his father and his grandfather were in the Royal Dutch Navy. In his youth, he graduated from his first Diana air rifle to a small bore carbine, and then to large caliber handguns. During his military service, he was a sergeant weapons instructor. He later joined the Dutch state police, where he soon became a detective, extending his already vast knowledge of firearms. Following the reorganization of Dutch police forces in 1994, Hartink became a specialist firearms detective with a regional police force, and since 1995 he has worked for a regional firearms department, where his main activities are related to the control of legal and prevention of illegal firearms. In addition to being a regular contributor to various publications, he has written extensively on weapons of every kind under a variety of pen names (as well as his own), and has translated books about weapons, ammunition, and the reloading of cartridges.
